

Program #2:

**“Real World Cosmetic Dentistry:
Faults Failures and Fixes”**

(1:00pm – 4:00pm)

Failures in dentistry are frequently blamed on materials but, in reality, operator error is often the culprit. This innovative and fast paced course will focus on aesthetics that are BUILT TO LAST. Clear, concise and systemized techniques will be presented to treat every aspect from simple to complex cases involving veneers, crowns and implant restorations. Cutting edge preparation techniques that will simplify difficult space management cases will be presented. You will understand how to integrate flowable composite on the provisional and communicate the final patient approved shapes along with discussion about using specific verbiage to control patient expectations. Techniques will be mastered using digital photography and you will turn a complicated camera into a point and shoot device. A clinical update on adhesive technology and ceramics will be presented so the team knows what systems to use and their limitations. Dr. Bassett will clear the confusion of products and techniques ranging from incremental layering to bulk fill technology in the posterior. Dimensions of color and anatomic stratification of anterior composite to attain a polychromatic imperceptible result will be shown. The cases presented have been published in national peer reviewed journals. There is something for everyone to learn!

Learning Objectives:

- Integrate sound occlusal principles to create synergy between form and function.
- Own the knowledge and ability to confidently prepare a difficult space management case
- Identify which adhesives and restorative materials work the best for maximum predictability.
- Learn how to achieve a predictable composite restoration following the stratification of opacities to achieve life like undetectable restorations.

Lecture format

About the Speakers:

A graduate of The Ohio State University, **Dr. Joyce Bassett** practices comprehensive restorative and aesthetic dentistry in Scottsdale, Ariz. She is Vice President and an Accredited Fellow of the American Academy of Cosmetic Dentistry. She is an Associate member of the American Academy of Esthetic Dentistry, a KOIS mentor, an active member in the Academy of Fixed Prosthodontics and a Fellow in the AGD. Dr. Bassett is adjunct faculty where she teaches the aesthetic continuum at the Arizona School of Dentistry. She was voted top 5 female CE educators, a national lecturer, published author and is a member of the editorial board of several peer-reviewed publications.
